------	------	------------	-----------------	----------------	-------------

Anthropology 101 examines customs, manners and ways of life – what anthropologists call culture – in selected groups around the world. By describing and comparing varieties of political and economic systems, family and kinship, personality and sexual behavior, art and leisure, this course offers insights about human culture, how it works, and what causes differences and similarities in human behavior. If the course is really successful, you should begin to see how anthropologists look at the world around us, what they perceive the human place in nature to be, and from what perspective or point of view they attempt to define and answer questions involving humankind.
