

All students are invited to the second installment of the
Queens College Mathematical Discoveries Series

Do you ever wonder what new discoveries
mathematicians are working on in the 21st century?
Is there even **anything** left to discover in math?

How about having some **PIZZA**
and hearing about one of the
greatest wonders
in all of mathematics:
the Mandelbrot set!

The Mandelbrot set is famous for its aesthetic appeal, its limitless boundary and its mysterious properties which only reveal themselves in full when the structure is magnified. Delve into this wonderful world guided by one of the world's experts on the subject, Professor **John Hubbard** from **Cornell University** who is coming to Queens College to speak to you, the students!

Monday, October 23, 2023
Free Hour (12:15 pm - 1:30 pm)
Kiely Hall 150

All students are invited!
You don't have to be
good at math.
